

Introduction To Project Management

Course Overview

This full-day course offers a basic introduction to Project Management for non-project managers and other employees with informal project management responsibilities. This course includes some hands-on exercises and simulations that allow participants to practice and understand the principles and techniques of project management.

Participants in this course will learn:

- The Purpose of Project Management
- Project Management definitions
- Where project management is used
- PM Knowledge Areas
- Project Management Resources

The Project Cycle:

- Initiating
- Planning & Design
- Executing
- Maintaining and Controlling
- Closing
